

Knowledge Co-creation Program Reinforcement of Meteorological Services

For what?

1. To provide basic knowledge and key techniques using numerical weather prediction, satellite meteorology and climate information for advanced meteorological services.
2. To help participants to improve their operational abilities to utilize such useful resources and techniques in their practical duties.

For whom?

◆ Target countries

Cook Islands, Fiji, Mozambique, Myanmar, Pakistan, Philippines, Samoa, Thailand and Vietnam

◆ Target Organization

NMHSs of the members of the WMO, or its equivalent

◆ Qualifications

Be meteorological officials classified as Meteorologists according to WMO personnel categories, presently engaged in meteorological services at NMHS or its equivalent.

Please refer to the General Information (GI) for detailed information on Qualifications.

When?

Duration

January 13 to March 20, 2021

Please refer to the General Information (GI) for detailed information on application.

Where?

The program is carried out in Tokyo, the central capital in Japan. You can also enjoy some cultural programs to find more about Japan through your stay.

Introduction of JICA Tokyo

("81" is the country code for Japan, and "3" is the local area code)

Messages

The JICA KCCP "Reinforcement of Meteorological Services" has a long history over 45 years providing comprehensive lectures in meteorology, and more than 50 instructors are waiting for you.

Staying in Japan for months, you will also have a lot of opportunities to experience Japanese cultures. I expect that you and us will foster and deepen friendship through this program.

I am looking forward to seeing you in Japan.

Japan Meteorological Agency

To be honest I feel that all training was of great of importance to me, my country, my organization as well. Through the program, it became much clear to me that for better quality of weather forecast, it is extremely important to follow accurately all procedures.

Since my return to home, I've had the opportunity to put into practice what I learned.

Hope this program will be able to train more meteorologists and improve their services.

Past participant from Mozambique
