- This seminar will be held by "Zoom", online meeting application.

Messages from ex-Participants

*“Lecture on ‘History of Network Development in Japan’ was useful. I found that, **legal framework and complete evolution of the most modern expressway system** was elaborated in a very professional and interesting way which touches the heart of the listener.”
(from Pakistan)*

*“I understand that **Specific law with high technology and technical standard** regarding the expressway engineering are the key for solving the problems in my country.(from Vietnam)*

*“During the lecture of Mr.Sakurai told about the devastation of Japan after world war II. However, according to him, Japan succeeded in establishing the most modern road network within 25 years. **The story encouraged us a lot.**” (from Pakistan)*

*“I was totally **amazed**” (from the Philippines)*

Message from Course Leader (Mr. Mr.Tatsuyuki Sakurai, Technical Advisor, Katahira and Engineers International Inc.)

Colleagues, are you having problems for improvement of road network of your country? Is the problem you are annoyed planning, implementation, or fund?

This knowledge sharing program of JICA presents practical strategies/measures that Japan adopted in developing the modern road network which supported economic growth as well as improving convenience of citizens' life.

I believe you will find some hints for solving your problem in this Program.
